1.7. Competition Format

Competitors are ranked according to a numerical score obtained by adding up components based on distance, style, in-run length (gate factor), and wind conditions. In the individual event, the scores from each skier's two competition jumps are combined to determine the winner.

Distance score depends on the hill's K-point. For K-90 and K-120 competitions, the K-point is set at 90 meters and 120 meters, respectively. Competitors are awarded 60 points if they land on the K-point. For every meter beyond or below the K-point,

extra points are awarded or deducted; the typical value is 2 points per meter in Normal hills and 1.8 points in Large Hills.

A competitor's distance is measured between the take off and the point where the feet came in full contact with the landing slope (for abnormal landings, the touchpoint of one foot, or another body part is considered). Jumps are measured with an accuracy of 0.5 meters for all competitions.

If two or more competitors finish the competition with the same number of points, they are given the same placing and receive the same prizes.

- **Individual Competition**

All entered Athletes start in the first round according to the start list. The best 30 Athletes from the first round are qualified for the second round – starting order is based on the results from the first round: the best Athlete jumps as the last one.

Duration of competition : 1st round 50 minutes + 15-20 min break + Final round 30 minutes.

PLEASE NOTE: estimated time, will be confirmed after Final Entry

- **Team Mixed Competition**

Each nation can enter one (1) Team consisting of 2 female and 2 male athletes. Athletes start in four (4) groups: each group consists of one (1) athlete from each nation start according to the start list. The best 8 nations are qualified for the Final round – starting order for last group based on current standing.

Duration of competition : 1st round 35 minutes + 15-20 minutes break + Final round 35 minutes.

PLEASE NOTE: estimated time, will be confirmed after Final Entry

which means that statistically around 17% of Athletes present at the Games will be subjected to doping control. Tests will be carried out in competition and out of competition. The Anti-Doping Program will be managed under the auspices of the International Testing Agency (ITA). Analyses of samples collected during the Games will be carried out in a laboratory accredited by the World Anti-Doping Agency (WADA). In order to ensure high quality, the work of anti-doping controllers will be evaluated by an international team of independent observers appointed by the World Anti-Doping Agency.

If any Athlete is chosen for Doping Control, he/she will be escorted through the Broadcast Mixed Zone by a Doping Control Officer or Doping Control Chaperone and will then be chaperoned to the Doping Control Station.

Where the Athlete already has a TUE granted by their National Anti-Doping Organization or International Federation for the substance or method in question and provided that such TUE has been reported in accordance with Article 5.5 of the International Standard for Therapeutic Use Exemptions, EOC will automatically recognize it for purposes of the EG2023 without the need to review the relevant clinical information.

In cases of emergency related to the need to use medicine that contains prohibited substances or methods considered prohibited for medical purposes during the EG2023, please contact the ITA with a request for further instructions. The ITA is the organization that, on behalf of the EOC, is responsible for the review of TUEs during the EG2023.

EOC Anti-Doping Rules are applicable to all athletes competing at the EG2023. All NOCs, Athletes, Athlete Support Personnel, and Medical Personnel should be familiar with the EOC Anti-Doping Rules as they cover the applicable procedures for Therapeutic Use Exemptions (TUEs) and athlete whereabouts. The EOC Anti-Doping Rules are available at <https://www.eurolympic.org/wp-content/uploads/2019/01/2021-EOC-Anti-Doping-Rules.pdf>.
